Increase Mileage and Power, Eliminate Water

# FUEL POWER PLUS CETANE BOOSTER®

**Concentrated Cetane Booster for faster starts, smoother performance and less emissions when you want Maximum Performance and Ignition.**

Significantly raise your fuel's cetane level with **Fuel Power plus Cetane Booster**. Diesel engines function on the principle of auto-ignition. Proper diesel fuel cetane levels are critical to maximum engine performance. And most diesel fuels have a cetane number considerably lower than what is optimal for engine performance. Fuel Power plus Cetane Improver is the most powerful cetane improver on the market as it raises cetane in your diesel fuel up to eight points.

## Diesel Engine Timing and Piston Position

Cetane number denotes how fast the fuel can be ignited. Higher the cetane number, lesser the ignition delay, which increases the engine performance. The higher the cetane the closer to top dead center, which produces better timing and a more complete burn. This results in more power and less emissions, thus reducing the amount of regen and increasing the longevity of your filters.

- Easier and Faster Engine Starts
- Improves Fuel Economy
- Increases Power & Acceleration
- Reduces NOx Emissions 5%
- Totally Disperses Water
- Prevents Icing
- Contains No Harmful Alcohols
- Creates a Cleaner Burn
- Reduces Engine Noise
- Reduces White Smoke
- Reduces Particulates
- Reduces Misfires
- Cleans Injectors
- Improves Lubricity
- Stabilizes Fuel

Perfect For:

Year  
'Round

Agriculture

Construction

Marine

Trucking

# FUEL POWER + CETANE BOOSTER

## Product Data Sheet

All the benefits of Fuel Power plus the most effective Cetane Booster on the market. Dramatically improves diesel fuel performance by increasing the cetane number. Proven effective in any diesel engine.

### DIRECTIONS:

Add prior to filling for best mixing results.

- Use 1 qt. for 250 gls. for an increase of 2 to 3 points.
- Use 1 qt. for 125 gls. for an increase of 4 to 6 points.
- Use 1 qt. for 60 gls. for an increase of 5 to 8 points.

**Fuel Power + Cetane Booster will not harm DPF systems, helps reduce regens.**

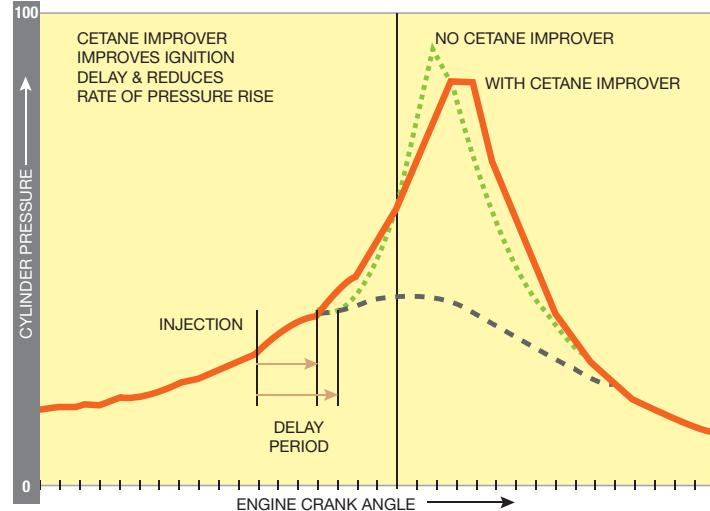

Cetane numbers vary based on the responsiveness of the fuel.

### How does Fuel Power + Cetane Booster Work?

When fuel is injected into the combustion chamber with air (usually 1 part fuel to 15 parts air), the fuel portion consists of multiple chemical compounds of varying molecular size.

As the piston starts the compression stroke, some short-chained molecules start to pre-ignite under pressure prior to the piston reaching its optimal position, causing lost power. Conversely and significantly more important – the very long-chained components of the fuel ignite post optimally, causing further wasted energy, engine vibration, and lost power.

Fuel Power + Cetane Booster, unlike most competing products, actually accelerates the combustion of slow combusting long-chain chemical components while retarding combustion of pre-igniting short-chain molecules. The end result is overall improved engine performance and increased fuel mileage.

Item #	Unit Size	Treats up To	Case #	Qty/Cs	Case Weight	Cases/Pallet
00188	32 oz.	250	90188	12	42	36
00122P	5 gl.	5000		1	42	36
00123	55 gl.	55000		1	456	4

For more information consult the Safety Data Sheet for this product. All used and unused products should be disposed of in accordance with local, state and federal regulations.
